Speed math + Chinese character practice · 双语练习

Speed Math: multiply by 11 乘 11 速算

The trick: split the two digits, put their sum in the middle.
43 × 11: 4 _ 3 → 4 + 3 = 7 → **473**. If the sum is 10 or more, carry 1 to the left digit.
拆开两个数字，把它们的和放在中间；和满十就向左进一。

23 × 11 = ☐☐☐	52 × 11 = ☐☐☐
35 × 11 = ☐☐☐	71 × 11 = ☐☐☐
48 × 11 = ☐☐☐ (carry!)	87 × 11 = ☐☐☐ (carry!)
